PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student and Data Analyst with hands-on experience in Python, SQL, Advanced Excel, Power BI, and Tableau. Skilled in data cleaning, exploratory data analysis, feature engineering, and machine learning. Experienced in transforming complex datasets into actionable insights through interactive dashboards and data-driven analysis to support business and research decision-making.

TECHNICAL SKILLS

- Programming Languages:** Python, Java
- Databases & Querying:** SQL (MySQL), SQL Queries
- Data Analysis and Machine Learning:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Statistical Analysis, Exploratory Data Analysis (EDA), Data Cleaning
- Data Visualization & BI Tools:** Power BI, Tableau, Microsoft Excel (Advanced), Data Visualization, Dashboarding
- Tools & Platforms:** Git, GitHub, Jupyter Notebook

PROJECTS

EEG-Based Emotion Classification (ML & Deep Learning)

- Analyzed EEG signal data using Python to identify patterns for emotion classification.
- Performed data cleaning, data wrangling, feature engineering, and exploratory data analysis (EDA) to improve model performance.
- Achieved ~99% accuracy and generated actionable insights during research internship at MANIT Bhopal.

Blinkit Grocery Sales Dashboard (Python + SQL + Power BI)

- Analyzed 10,000+ sales records using SQL and Python to identify revenue trends, KPIs, and customer behavior.
- Developed an interactive Power BI dashboard for data visualization, business intelligence reporting, and performance analysis.
- Delivered data-driven insights to support inventory optimization and business decision-making.

Hospital Emergency Room Analysis Dashboard (Excel/Power BI)

- Analyzed patient and operational data to identify trends in wait times, admissions, and demographics.
- Built interactive dashboards using Excel and Power BI for real-time data visualization and reporting.
- Provided actionable insights to improve operational efficiency and decision-making.

WORK EXPERIENCE

MANIT Bhopal — EEG-Based Emotion Recognition System: Developed attention-based deep learning models (SSAN + TFFN) for emotion classification using EEG signals; achieved ~99% accuracy with preprocessing, feature engineering, and model optimization. Mentor: Dr. Rahul Kumar Chaurasiya — Jun 2025 | Link: [\[LINK\]](#)

MoRTH – National Informatics Centre (NIC) — AI Chatbot & Document Intelligence System: Developed an LLM-based RAG chatbot and document analytics system for data extraction, summarization, and insight generation on secure government datasets. — Nov 2025 – Feb 2026 | Link: [\[LINK\]](#)

NIT Tiruchirappalli — AI & Smart Grid Analytics Apprenticeship: Performed spatiotemporal data analysis using AI-based models for load forecasting and smart grid optimization; applied AI, data analytics, and computational techniques to improve renewable energy integration and system resilience. — Aug 2025 – Mar 2026 | Link: [\[LINK\]](#)

EDUCATION

Babasaheb Bhimrao Ambedkar University, Lucknow

- Bachelor of Technology (B.Tech) – Computer Science 2022–2026 | Current CGPA: 8.60 / 10

Vivekanand Shishu Kunj School

- Class XII: 93% | Class X: 87%

CERTIFICATIONS

- Data Analytics Virtual Internship [LINK](#)
- Software Engineering Virtual Internship [LINK](#)
- Data Visualization with Tableau [LINK](#)
- Machine Learning with Python [LINK](#)
- Data Analytics Certification (Power BI & SQL) [LINK](#), [LINK](#)

ACHIEVEMENTS

- Completed AI & data analytics apprenticeship at NIT Tiruchirappalli focused on energy forecasting
- Developed an LLM-based RAG chatbot at NIC (MoRTH) for data retrieval, summarization, and data analytics

SOFT SKILLS

- Analytical Thinking, Problem Solving, Data Interpretation, Communication
- Team Collaboration, Critical Thinking, Attention to Detail, Time Management
